

Senior Teaching and Learning Together

Spring 2015

Volume 3, Issue 3

This is the last semester for the 2014-2015 college year. We hope that you have taken the opportunity to enrol in some of the course offerings during the fall and winter semesters and have enjoyed those classes. The Regional Committees have done a great job of putting together a selection of 71 courses for the spring semester. Come to registration next week. There is a course for you in that list.

WE NEED YOUR INPUT

About this time last year the TSC Board of Directors set in motion the process of strategic planning. One of the committees was given the task to look at communication, develop strategic objectives, and make recommendations.

The committee is now looking at the public awareness component of their communication plan.

Your input would be very valuable at this stage of their work and so they are asking for your input. At registration next week we ask that you take a few minutes to fill out a survey for the committee.

Thank you for your input.

Minding Your Beeswax- Candle Making

Throughout her life Catherine Wile has engaged with the natural world, enjoying many of the gifts it has to offer while striving to minimize her environmental footprint. Beeswax is one such gift of nature. Her introduction to beeswax, though accidental, has set her on a course of learning the craft of quality candle making.

During the Winter semester, Catherine offered a candle making course. Participants learned where beeswax comes from, how it is processed and how to make beeswax candles.

Course	Instructor	Location	Day	Time	Start	Se
